

MULTITOOL

MODEL	MULTITOOL
WEIGHT (Kg)	61
OIL PRESSURE (bar)	200
OIL FLOW (l/min)	20-50
A DIMENSION (mm)	240
B DIMENSION (mm)	908
C DIMENSION (mm)	612

A NEW C4 BRANDED PRODUCT FOR MINI EXCAVATORS.
It can be applied on excavators from 1.8 to 3 tons.

The hydraulic system has been suitably designed and sized to ensure downstream the power required by the tool group and upstream to adapt to the incoming oil flow rates by the excavator. The heart of the equipment is the tool support frame, which is the interface that allows the connection of the tools to the tool holder frame while keeping only one main machine body. These features make our Multitool a product highly versatile and useful for many uses.

	<p>Quick change tool system through pins.</p>		<p>Transmission with reduced chain.</p>		<p>Standard with manually adjustable attachment on 4 positions.</p>
